

How To Load Miss Saigon Samples And Data

Step 1. Insert your formatted CompactFlash card into card reader/PC/Mac and open. You will see a folder called ROLAND.

Step 2. Open the folder marked *Saigon* and copy all under the Roland Folder.

Step 3. Double click the *Roland* folder and you will come to a screen like fig. 2 except there will be a folder at the top named *BKUP1*. I have already renamed this *Miss Saigon etc*. Open *BKUP1* (or any unused backup folder) and copy all of the files from the *Miss Saigon SPD S* backup folder

Step 4. Open the folder named SPD and copy all of the files named SPD that you downloaded as part of this Miss Saigon package. You will get a prompt at the end. Choose *Copy And Replace Files* when asked. Do this for all instances.

Step 5. Re-insert the CompactFlash card in the SPD S and follow the prompts. You should now have all the patches you need, in order, for *Miss Saigon*. You will also have sounds and patches for *High School Musical*, *All Shook Up*, and *13:The Musical*, as well as some samples of Taiko Drums from *EWQL Stormdrum*. Enjoy.
